6-37

[App. F III-2]

Serial
No

From

The Deputy Commr Thimog Dist
no 17373 c 450/34 D 22 12-31
Submits for sanction a
drainage scheme for the Thimog,
Tonn at an estimated cost of
Rs 3,88,000

1 The estimated cost of the scheme
is Rs 3,88,000/-

2 The D.C recommends that
the S & P charges amounting to
Rs 4,300 may be waived as a
special case This is now calculated
at 1 1/2% according to standing order

3 The proposal is to work
out the scheme in stages at an
estimated cost of Rs 20,000 per year
the Mty & the Govt meeting the
same in equal proportions. At
this rate, it would take about 20
years for the entire scheme to be completed.
The proposal is for orders.

Approved would Commit Govt to ⁸ finance the Scheme every year to the extent of Rs 1000/- for a period of twenty ^{years} ~~off~~ This may not be desirable. Further the provision up in the first ^{last} years will certainly have deteriorated by the time the entire Scheme is worked out. The period of twenty years is too long - Perhaps ^{best} a Scheme ^{as can} be completed worked out in seven years or at the most, ten years ^{of} can be considered. It is for consideration whether, with a view to prevent stagnation of water and the consequent breeding of mosquitoes, a Scheme ^{providing} for an surface drainage to all parts of the ~~est~~ town may not be got prepared & launched, the underground drainage Scheme being held by for being taken up when the finances of the mls improve. If this is approved the estimate will get reduced to about Rs 75000/- and the work can be completed in three years.

The Res' proposal is for action

OFFICE OF THE DEPUTY COMMISSIONER
- SHIMOGA DISTRICT

Dated Shimoga, 22nd December 1935

FROM

S NARAYANA RAO, Esq., M A (HONS),
Deputy Commissioner,
Shimoga District

TO

M Venkatanaranappa, Esq., B A ,
Secretary to Government,
Development Department,
Bangalore

SIR,

Subject - Drainage scheme-Shimoga Town

M
Adverting to your letter No L 1800 dated the 7th
September 1935 enquiring what the revised scheme of drainage of
the Shimoga is estimated to cost and requesting that the same may
be obtained from the Bureau of Sanitary Engineering and forwarded
early etc and in continuation of my letter of even number dated the
4th November 1935 on the subject, I have the honour to forward,
herewith the comprehensive drainage scheme for Rs 388,000/- prepared
by the Sanitary Engineer and to state as follows -

2 At first, a project for providing drainage to the Shimoga
town at an estimated cost of Rs 2,08,000/- was prepared by the
Sanitary Engineer, providing for laying an underground main pipe
and also sub-mains to convey the sewage of the old town the estimate
did not provide for the drainage of the Burgigudi Extension and the
construction of street drains for the old town since it was
considered that on account of the flat nature of the place, there
might not be enough sewage to flow into the main drains, the
Sanitary Engineer was requested to furnish an estimate for open
surface drains Accordingly, the Sanitary Engineer has prepared
and sent up the comprehensive scheme referred to above providing

L.S.

(2)

for the drainage of the old town as well as the Extension. The main features of the scheme and its utility are explained in detail by the Sanitary Engineer in the note accompanying the estimate. The scheme was considered by the Municipal Council at its meeting held on the 28th October 1936 and it was resolved that it might be adopted, that the Government might be requested to meet half the cost of the estimate and that the remaining half might be met out of the funds of the Municipality and the work got executed in easy stages at an annual outlay of Rs 20,000/-

3 It may be stated that the town is growing in importance and that it needs improvements in several directions. The Municipal Council has been striving hard to effect improvements but its efforts cannot be of much avail, without substantial aid from the Government. The Electrification of the town has recently been completed and the Municipality has to incur an increased expenditure of about Rs 13,000/- as against Rs 6000/- hitherto spent annually for street lighting. The estimate for Rs 75,000/- for the improvement of water supply which has been submitted is pending orders of Government and when the same is sanctioned, the annual maintenance charges to be incurred by the Municipality on that account will go up from Rs 19,000/- to Rs 27,000/- The drainage scheme is very necessary and has to be taken up urgently to control malaria in the town which is getting worse every year. The request of the Municipal Council deserves, therefore the sympathetic consideration of the Government.

4 If work estimated at Rs 20,000/- is done each year, the Government and the Municipality meeting the cost in equal proportions, there is bound to be marvellous improvement in the sanitation of the town in the course of about five years as by that time, the essential features of the scheme will have been worked out. It will not be difficult for the Municipality to Rs 10,000/- each year for the

(3)

5. In the total cost of the estimate of Rs 388,000/- is included, a sum of Rs 43,000/- towards the Establishment and tools and plant charges and it will be a great relief to the Municipality if it is kindly waived as a special case and sanction accorded to the estimate for Rs 345,000/-.

6. The entire records connected with the scheme are submitted for favour of early orders.

I have the honour to be,
Sir,
Your most obedient servant,

Deputy Commissioner,
(a Shimoga District
